PREFACE.

RECIPES, like friends, must be tested before their worth is proved, and since "the proof of the pudding is the eating," the compilers of this little volume take pleasure in assuring their readers that the toothsome dishes herein described will bear that test. The descendants of the noble pioneer women of our state are worthy successors to their mothers and grandmothers in the art of domestic cookery, and it is to their generous co-operation that we are indebted for the choice recipes contained within these pages. German, American and French have given liberally of their store so that our West Bend Cook Book will be found to embrace a great variety. We do not claim that this little work is comprehensive in detail, for much has been omitted which is to be found in the ordinary cook book, but we have aimed to gather together some of the choicest recipes of our German-American and French-American cousins whose untiring efforts have helped in such great degree to make our beautiful Wisconsin the prosperous state it is to-day. With this explanation we beg that our readers will be

"To our faults a little blind,
And to our virtues very kind."

—M. B. W.

INTRODUCTION.

IF I were asked the greatest need of the American housewife of to-day, I should answer without hesitation, "A wiser and more complete training for service in the home." This training should be given not only to the class employed as assistants, but to the mistress herself.

The feeblest judgment admits the necessity of training for every profession, for every trade, for every department of labor. No one pretends to question it; time and money are given and given freely to secure it. But in one department, and that the most elemental and important in its need, we seem to take it for granted that little or no preparation is required. The result is, the young married woman too often steps into her home to preside over its destinies ignorant of almost everything that can build its foundation deep and secure. She may know every other form of mathematics save that which will enable her to use wisely her husband's income.

It is unnecessary to touch upon more than one point of this important subject. I therefore select the room in the home on which beyond all others its comfort and well-being must depend—the kitchen. Here the food is to be prepared and on the right preparation depend the health and the prosperity of the family. I say health, because every particle of improperly prepared food is more or less indigestible and must sooner or later make its grim and relentless demand

upon the system. I say prosperity, because the most generous income may be squandered in waste; for alas! it may be said in passing, no department knows more of cruel waste than the American kitchen of the present hour.

While America has the finest food products in the world, these products are unquestionably the most abused in preparation. This is one of the reasons why two hundred millions of dollars find their way annually to the pockets of merchants and hotel keepers in foreign cities. The traveler must be dull indeed if he does not bring from his experience a desire to improve these conditions in his own land.

The first step toward this should be the establishment of a department of cooking in every young woman's school in this country. This essential art, with its essential text-book, should be mastered by every woman. We should surround such instruction with every appliance and every well-appointed equipment that science can bestow. When this is done we shall find that no investment is more secure in its reward.

On such investment depends the prevalence of successful and well ordered homes, and on the successful and well ordered home depend not only the well-being, but the higher life of a people; the truest spiritual uplift will come only when the people know that

“Not soul helps body
More than body helps soul.”

Bread.

“Here is bread, which strengthens man’s heart and therefore called the staff of life.”

WHEAT BREAD.

About nine o’clock in the morning put a cake of Yeast-Foam to soak in warm water, enough to cover it; when it has dissolved stir in enough flour to make a batter. At noon, pour boiling potato water over a cup of flour, stir well, add two mashed potatoes and when cool stir in the yeast. The sponge may be set early in the morning or in the evening. For four loaves of bread take one quart of warm water and flour enough to make a batter that will drop from the spoon; add the sponge. When light, put in one tablespoon of sugar, one of salt, one large spoonful of lard, melted, and add flour enough to make a dough. Knead smooth, set to rise, and when light put into pans. When light enough to bake the dough will not retain the pressure of the finger. Bake one hour.

Mrs. P. W. Harns.

WHEAT BREAD.

Save the water in which potatoes have been boiled at noon and pour boiling hot over three or four medium sized potatoes which have been boiled and put through a ricer. Add flour to make a medium batter. When this sponge is lukewarm stir into it one-half cake Yeast Foam, which has been dissolved in half a cup of warm water and let stand until the next morning. Do not keep in too warm a place or it will become too light and perhaps sour. In the morning take about two quarts of flour, heaping tablespoon of lard, table-spoon of sugar, heaping teaspoon of salt and a pint of boiling milk poured over the flour. Let stand until cool and then break in an egg; mix with the spoon, then knead stiff, let rise and knead again. Let rise the second time, knead and put into pans which it half fills. When light enough to reach the top of the pans bake nearly an hour. The above amount makes three good-sized loaves.

—Mrs. W. E. Wolfrum.

BREAD.

At night dissolve one cake Yeast Foam in one-half cup warm water. Mash fine three boiled potatoes and pour over them one pint of the water in which they were boiled; while hot add flour enough to make a moderately stiff batter. When

lukewarm add the dissolved yeast cake and let stand over night. In the morning add three pints warm water, two teaspoons salt and as much sifted flour as can be beaten in with a spoon. Let rise and when light add one and one-half tablespoons each of lard and sugar. Knead stiff and let rise again, then mould into five loaves, let rise, and bake forty-five minutes in moderate oven. Milk may be used instead of water, but should first be scalded and added when lukewarm.

—Mrs. David Fletcher.

FRENCH BREAD.

Wash three medium-sized potatoes, steam without removing the skins, mash thoroughly (skins and all) with half pint of flour; then add half pint of lukewarm water, and half ounce of salt. When well mixed let stand in a place where the temperature is about 78 degrees Fahrenheit for one hour; then add half pint of good yeast and let stand in warm place for about nine hours. It may require a little more or less than nine hours, but the time may be known in this way—the compound will, after awhile, gradually and slowly foam for some time and then begin to fall. As soon as it begins to fall, mix about a cup of lukewarm water with it and strain through a sieve; mix what is strained with two pounds of flour and sufficient tepid water to make an ordi-

nary dough. Knead thoroughly, let stand in a warm place until it cracks on the top, which will probably be about an hour; then put six pounds of flour in the bread pan and make a hole in the center, place in this some warm water and the cracked dough with two even tablespoons of salt. Knead well with water enough to make an ordinary dough. The more the dough is kneaded, the lighter the bread; then shape the loaves, let rise, and bake for about an hour in a quick oven. To shape loaves of French bread, divide the dough as soon as kneaded into as many parts as loaves required. Knead each part so as to form a ball, then by rolling and pulling give it an elongated, sausagelike shape. When the dough is thus lengthened take a small rolling pin or a round stick, place it on top of the dough lengthwise, press on it and roll a little to and fro, so as to make a furrow in the middle. Have a cloth well dusted with flour, and place the loaves upon it with the furrowed side under; let rise as for ordinary bread, and place in baking pans with furrows on upper side. Dust the furrows well with flour to prevent them from closing in baking and rub the rest of the loaf with a cloth dipped in milk, which gives the shine seen on French bread. The pans used for baking should be shallow and broad enough to hold the loaf without crowding so there may be as much crust as possible. Half of the above recipe will make four medium-sized loaves of bread.

—Mrs. C. A. Weil.

BREAD.

Two quarts flour, one quart lukewarm water or milk, one cake yeast, little salt and sugar. Work all together one-half hour, put in greased dish, let rise three hours. Mould in two loaves, let stand one and one-half hours. Bake one hour.

—Mrs. C. Muellenbach.

HOP YEAST.

Put a handful of hops in a bag, boil in two quarts of water with three good-sized potatoes. When the potatoes are cooked, mash fine, add hop water, half a cup sugar, two table-spoons salt and one of ginger. When cool add one teacup good yeast, put in a jar and keep in cool place.

POTATO YEAST.

Boil twelve medium-sized potatoes until tender and then put potatoes and water through a sieve. Mix one pint flour smooth with water, then turn into one quart boiling water and cook until it is like thin gravy; while hot add three-fourths cup each sugar and salt, and the strained potato water. When lukewarm add four yeast cakes dissolved in water. Use one quart of this yeast to make four loaves of bread.

—Mrs. G. W. Jones.

POTATO YEAST. (Fine.)

Cook six good-sized potatoes, mash fine, then add the water in which they were boiled and one-half cup sugar; when lukewarm add flour to make a thick batter, then add two cakes of dissolved Yeast Foam. One cup of this yeast will make six loaves of bread. Will keep four weeks.

Fall on and try thy appetite to whet."

CREAM DRESSING FOR SALAD.

3 eggs (beaten),	1 teaspoon salt,
6 tablespoons cream,	1 teaspoon mustard,
3 tablespoons melted butter,	$\frac{1}{2}$ teaspoon pepper, 1 teacup vinegar.

Beat ingredients thoroughly, heat, and stir constantly until thickened; when cool, mix with salad.

—Mrs. Chas. A. Silberzahn.

DRESSING.

2 egg yolks,	1 teaspoon vinegar,
$\frac{1}{2}$ teaspoon mustard,	1 white of egg,
1 teaspoon sugar,	Little salt and red pep- per.
$\frac{1}{2}$ pint olive oil,	

Put yolks in cold soup plate; add mustard, salt, pepper and sugar; beat together well, then add olive oil, a few drops

at a time, until as thick as butter; while beating add vinegar, little at a time. A little Worcestershire sauce improves it. Add beaten white of egg last. Line bottom of salad dish with lettuce leaves, and serve on lettuce leaves.

—Mrs. C. A. Adams.

EXCELLENT SALAD DRESSING.

Boil five tablespoons vinegar and stir into it the well beaten yolks of five eggs; take from the stove as soon as it thickens. While hot add a piece of butter, size of a small egg, and one teaspoon of a mixture composed of five teaspoons salt, one heaping teaspoon mustard, one level teaspoon cayenne. When cold, add one-half pint of cream, whipped stiff, and juice of half a lemon. This is most excellent for salmon salad composed of equal quantities of canned salmon and celery.

—Mrs. N. B. Lawson.

MAYONNAISE DRESSING.

2 egg yolks,

1 lemon (juice).

$\frac{1}{2}$ pint olive oil,

Beat yolks thoroughly with egg beater, add lemon juice, then gradually add the oil (about half a teaspoon at a time) and beat thoroughly until all oil is used. This recipe makes about one pint of dressing. —Mrs. A. P. Chapman.

MAYONNAISE DRESSING.

2 egg yolks,	1 teaspoon dry mustard,
2 saltspoons salt,	$\frac{1}{2}$ pint olive oil,
1 saltspoon pepper or pinch cayenne,	3 tablespoons cider vine- gar.

To prevent curdling beat with wooden spoon the yolks, salt, pepper, and mustard together before adding the oil, which must be stirred in gradually a few drops at a time, taking care to blend each portion with the egg before adding more, stirring constantly until a thick paste is formed and the mixture has a glossy instead of a velvety appearance; then add a few drops of vinegar, stirring all the time, until it is the consistency of thick cream; stir in more oil in drops until mayonnaise is stiff again, when a few drops of vinegar should be beaten in. So continue alternating until all oil is used, adding vinegar rather cautiously at last, so that when the mayonnaise is finished it will be stiff enough to remain on top of the salad. The dressing should be stirred one way to prevent curdling. Add a few drops of lemon juice with the vinegar. The oily flavor is entirely lost in combination with the raw egg. Fifteen or twenty minutes are required for putting the ingredients together. Care must be taken not to add too much oil at first or the mayonnaise will curdle. When this happens, beat the yolks of one or two eggs on another

plate, add to them the curdled mayonnaise by degrees, and finish by adding more oil and vinegar, or lemon juice. The danger of curdling is less if the addition of vinegar is begun when only a little oil has been used. After all ingredients are thoroughly mixed the addition of a cup of whipped cream enriches the dressing. This sauce keeps well if bottled and corked with a glass stopper, and it may be made at any time in advance when yolks are left over from baking. In summer, place oil and eggs in cold place half an hour before making. The well beaten white of an egg may be added to the dressing just before using. Butter may be used instead of oil in any mayonnaise dressing by first creaming it, and adding slowly a well beaten egg. This makes a nice dressing for fish.

—Mrs. H. D. B. Dustin.

2 Spanish onions,	$\frac{1}{2}$ teaspoon lemon rind,
Meat remnants,	$\frac{1}{4}$ teaspoon pepper,
2 tablespoons crumbs,	$\frac{1}{2}$ teaspoon salt,
1 tablespoon parsley,	Cold milk or stock.

Peel the onions, put them into a saucepan of boiling water, let boil till sufficiently soft to allow the middle part to be taken out; the time will depend on the size of the onions; a small onion will require about an hour, a large one an hour and a half or two hours. Take any kind of cooked meat, small pieces of ham, bacon or fowl; mince all together, add the bread crumbs and seasoning; chop and add the pieces taken from the onions, bind the mixture with a little milk or stock, fill the onion shells with it, put them into the saucepan, pour in sufficient hot stock to half cover them and simmer for little more than half an hour. Take the onions from the pan when cooked, put them on a dish, thicken the gravy with a dessertspoon of flour mixed with a little cold water and browning, pour it round the onions and serve. If the onions are small, use more than the number given. This dish can be varied by putting the onions in the oven and baking after they are filled and covered with buttered paper.

—Ida M. Helm.

BAKED POTATOES.

Altogether, the most wholesome way to cook potatoes is to bake them. Select those as nearly of a size as possible, wash and scrub them thoroughly, wipe dry, cut off a slice from each end and bake in a hot oven about an hour. Serve as soon as done.

—J. B. Smiley.

ESCALLOPED POTATOES.

Sprinkle with salt and serve hot.

—Mrs. P. W. Harns.

FRIED POTATOES.

Peel and slice raw potatoes, fry in butter, lard or beef-dripping, season with salt and pepper and serve hot. Very nice. Sliced boiled potatoes may be fried the same way. Keep the kettle closely covered. Cheap and good. —J. B. Smiley.

SARATOGA CHIPS.

Peel potatoes carefully, cut in very thin slices and keep in cold water over night; drain off the water in the morning and rub the potatoes between napkins or towels until thoroughly dry; then put a handful at a time into a kettle of very hot lard, stirring with a fork so that they may not adhere to the kettle or each other. As soon as they become light brown and crisp remove quickly with a skimmer and sprinkle with salt as they are taken up. —Mrs. F. Lauer.

SARATOGA CHIPS.

Peel good-sized potatoes, slice as thin and evenly as possible, and soak in ice water an hour; have a kettle of very hot lard, as for cakes; put a few at a time into a towel to drain and dry, then drop them into the boiling lard, stirring them occasionally. Put half a cup of rice into a quart of boiling salted water, boil five minutes then put in a steamer for twenty minutes, then turn into a strainer, shake lightly allowing a stream of cold water to run over the rice; continue this treatment until the flakes become very distinct and white then put back in steamer until thoroughly heated.

SAUERKRAUT.

In October, slice good firm cabbage heads, after the coarse outer leaves and large fibers have been removed; put a layer of cabbage about six inches thick in a jar, sprinkle with a handful of salt, pound down with a wooden potato masher, and so continue until the jar is nearly filled; cover with cabbage leaves and a cloth; then put in a board cover, with a stone on the top to keep the cabbage under the brine; when the kraut begins to ferment put it in a cool place, where it will not freeze. Will be ready to cook in four or five weeks. Sauerkraut may be served cold from the jar or may be cooked slowly about two hours in salt pork fat. Caraway seed may be added if preferred.

Meats, Fish, Etc.

“All the tributes land and sea afford”.

BOBATEE.

$\frac{1}{2}$ pound cooked or raw chopped meat—beef, mutton or veal, or some of each.	1 cup milk, 1 good sized slice bread, soaked in the milk, 2 eggs beaten light, 6 or 8 almonds, ground fine, 1 tablespoon curry powder, Juice of one lemon,
1 ounce butter, 1 onion, sliced thin and fried in the butter,

—Mrs. C. H. Miller.

To one pound of raw chopped beef add one egg, well beaten, one-half cup cracker or bread crumbs, salt and pepper to taste, with a little sage or onion, if wished (good with neither), and mould into a loaf. Place several pieces of butter on top and put in a dripping pan containing a little water. Bake about two hours, basting often.

—Mrs. E. C. O.

BEEF OLIVES.

1 pound steak,	2 ounces bacon,
1 egg,	$\frac{1}{2}$ ounce flour,
3 tablespoons crumbs,	1 pint stock or water
2 tablespoons sauce,	$\frac{1}{4}$ teaspoon pepper.
$\frac{1}{2}$ tablespoon salt,	1 tablespoon minced herbs,

Flatten the steak, cut into thin strips about three inches wide. Mince the bacon, which should not have much lean, mix it with bread crumbs, herbs, salt and pepper, and half the beaten egg; spread some of the mixture on each strip of beef. Roll up the strips and tie each with a piece of fine string. Dip the rolls into remainder of the egg and put into a stew pan, packing them lightly to keep the shape. Add the stock or water, cover the pan and let olives simmer for about an hour. When cooked, take from the pan; mix the flour with a little cold water or stock, stir it with a quarter teaspoon of browning into the gravy, boil two or three minutes, then add the Worcester sauce. Remove the strings, arrange the olives on a dish and pour gravy round them. Veal seasoning can be used to fill them, if preferred, or an onion, chopped fine, can be added to the seasoning given above.

BROILED BEEFSTEAK.

All steak should be cut at least three-quarters of an inch thick, and should never be pounded, as it affords ready escape of all the juices. Heat the broiler well before putting on the steak; turn frequently, being careful not to burn. When the meat is cooked, place it on a heated platter, season with salt and pepper, and place a lump of butter on top; turn the steak and repeat this process, so as to have both sides seasoned.

—Mrs. A. Husting.

BROWNEE BEEF (Pot Roast).

Heat a tablespoon of butter in a kettle, put in about three pounds of beef chuck, which has been seasoned on both sides with salt and pepper; add clove and tiny piece of onion; cover closely so the meat may cook in its own juice, to which should be added a very little water to keep from burning. Turn occasionally, and when tender—in about four hours—take out meat and make a gravy by stirring a tablespoon of flour in the drippings, adding hot water to make of proper consistency. The onion and clove may be omitted, if preferred.

Mrs. Chas. A. Silberzahn.—

CORNEE BEEF. (Pressed.)

Put the meat in cold water, skim carefully while simmering slowly five or six hours; then remove the bones, pick the meat to pieces, mix in the fat so it will be marbled, pack in a granite pan, press with a heavy weight and serve cold in thin slices.

—Mrs. Micks.

FILLED PORK.

1 cup bread crumbs, Pepper and salt.

ROAST BEEF.

Put a three or four-pound roast in a dry pan with no seasoning of any kind; set pan on a brick in a smoking hot oven; as soon as the roast is well seared over, open the oven doors and decrease the heat to medium as soon as possible, then close the doors and cook very slowly until done. Beef roasted in this way is excellent, as it retains all its juices and flavor. Keep stock on hand for gravy, as there will be none in the pan. Seasoning extracts the juices, so season after it is served.

—Mrs. Knox.

ROULADEN.

Take round beefsteak, press flat, season with salt and pepper, cut into three inch squares, spread a thin slice of ham (fat and lean) over each square, and sliced onions over the ham; roll and tie firmly with a string. Place a medium-sized kettle over a moderate fire and melt in it a good-sized piece of butter; roll the rouladen in this, pack closely together, cover well, and during the first ten minutes of simmering turn them; then pour on gradually enough boiling water for gravy; boil slowly forty-five minutes then add a little flour made smooth in a large tablespoon of sour cream; cook fifteen minutes longer, then remove the strings, place the rouladen in a serving dish and pour the gravy over.

—Clara L. Kuechenmeister.

OLD FASHIONED BOILED DINNER.

Early in the morning put a four-pound piece of corned beef in a large kettle of cold water; simmer slowly; about ten o'clock put in a one pound piece of salt pork, a few small beets with unbroken skin, and a couple of large carrots; at eleven o'clock put in turnips cut in three or four pieces, parsnips and some good sized peeled potatoes; add salt and a pinch of red pepper. Serve the vegetables in separate dishes. A nice dessert with this dinner is boiled Indian pudding.

—Mrs. Micks.

SPICED BEEF.

Season raw chopped steak with salt, pepper and spices to taste; add two eggs, half a pint of bread crumbs, five table-spoons cream and a small piece of butter; mix and make into a roll with enough flour to bind it together, put in a pan with a little butter and bake. Slice when cold.

—Mrs. R. S. Lynch.

TO BOIL CORNED BEEF.

Put the beef in enough cold water to cover, let gradually come to a boil, and cook slowly until tender, skimming the grease from the top as it boils. May be much improved by boiling potatoes, turnips and cabbage with it. Allow about twenty minutes to each pound of meat.

—Rose Kuehlthau.

TO ROAST BEEF.

Select a good rib roast and wipe with a damp cloth instead of washing. Put a dripping pan on the stove until it gets smoking hot. Put in the beef without seasoning or dressing of any kind, let it sear on both sides, then rub with salt, sprinkle with a little pepper and add just enough boiling water to keep it from burning. Place in a good hot oven to roast, allowing fifteen minutes to a pound and fifteen minutes for the pan. Replenish the water as it cooks away.

—Mrs. C. A. Weil.

FILLET, A LA JARDINIÈRE.

Remove the skin and fat from a good-sized fillet of beef, lard with strips of bacon on both sides. Have a roasting pan ready in which has been browned a large piece of butter; brown the fillet on both sides, then gradually add one cup sour cream, and, if necessary, a little boiling water; baste often. Roast one hour. Serve on a large platter, garnished with different vegetables—peas, cauliflower, small potatoes fried whole, and mushrooms—each vegetable formed in fields.

$\frac{1}{2}$ pound veal,	3 eggs,
$\frac{1}{2}$ pound pork,	Pepper and salt to taste.
1 cup bread crumbs,	

Chop the meat very fine, mix with the other ingredients, form into a loaf and roast two hours in plenty of butter. Slices of bacon on top improve the meat wonderfully. After the loaf is browned on top (it must not be turned) pour in a half or a whole cup of boiling water to prevent burning.

—Mrs. William A. Pors.

MEAT LOAF OR HOCK.

1 pound beefsteak, and 2 beaten eggs,
 1 pound pork, chopped ½ small loaf bread crumbs,
 fine together,

Season to taste with sage, salt and pepper. Mix into loaf and bake thirty minutes.

—Mrs. Emil C. Pors.

MEAT SHAPE (English).

$\frac{3}{4}$ pound cooked meat,	1 teaspoon minced parsley,
3 ounces cooked rice,	$\frac{1}{4}$ teaspoon pepper,
1 onion,	$\frac{1}{4}$ teaspoon salt.
3 tablespoons gravy,	

Mince the meat very fine; peel, scald and mince the onion, mix it with the meat, rice, parsley, pepper and salt. Bind the mixture with the gravy, and turn it into a buttered basin or moulded shape and steam for an hour. Thicken some stock with butter and flour, add a teaspoon of Worcester sauce. Turn out the shape and pour gravy, which should be a good brown color, around it. This is an economical way of using the remnants of cold meat, vegetables or pieces of bread. Cold carrot or any other vegetable chopped fine, may be mixed with the meat and improves the flavor. Pieces of bread, soaked a few minutes in a little stock or milk, beaten so that no lumps remain, or cold potatoes, mashed smoothly, may be used instead of rice. An egg makes the dish richer.

—Mrs. C. A. Weil.

ROAST LEG OF LAMB (Sour).

Remove all skin and fat, place in a deep dish and sprinkle a little salt over, taking care not to use much, as it will toughen the meat; then add several small onions, or one large one, cut in slices, a scant tablespoon of whole pepper, three or four cloves, one bay leaf and several juniper berries; cover with vinegar, which if very strong, should be diluted with water. Leave in vinegar from two to four days; when ready to use draw narrow strips of bacon through the meat, pepper and salt slightly, place in a hot dripping pan, in which has been melted a piece of butter, the size of an egg, pour in a cup of boiling water, cover and put in a moderately hot oven, basting occasionally. In about two hours the roast should be done and a rich brown in color. If not sour enough add some of the spiced vinegar. A little sour cream may be used to thicken gravy, or flour and water if preferred. A slice of lemon and a little sugar improves the gravy. While in the vinegar the meat should be turned over every day. Beef roast (sour) may be prepared the same way.

—Rose Kuehlthan.

—Mrs. R. S. Lynch.

Brown one-half cup butter in a kettle, then put in five pounds lean veal, and brown it well on all sides, being careful not to burn it. Add a large cup of thick sour cream; turn the meat until the cream is thoroughly browned, then add salt, one bay leaf, little pepper, and water enough to boil about two hours. Let the water almost boil out, then remove the meat; add water and flour to thicken the gravy, and strain. Very nice.

—Mrs. Frances E. Ott.

PRESSED VEAL.

Boil two or three pounds of veal until tender; season with salt, pepper and butter; let cook a little longer, then take out the meat and chop very fine. Let the gravy cook down until thick, then pour over meat, press into mould and let stand in a cold place over night. —Mrs. Ralph H. Norris.

VEAL LOAF.

Chop three pounds veal and three-quarters pound lean pork fine, remove all skin and shreds; add some soaked bread, pepper, salt and one beaten egg. Mix thoroughly and mould in form of loaf; roll in toasted bread crumbs, and roast in quick oven two hours; use plenty of butter and baste frequently.

3 eggs,	Butter size of walnut.

Mix thoroughly, pack in deep covered pan. Bake an hour.

—Mrs. Fred Wolfrum.

VEAL LOAF.

2 pounds veal,	$\frac{1}{4}$ teaspoon allspice,

1 teaspoon salt,	$\frac{1}{2}$ lemon (juice),
$\frac{1}{4}$ teaspoon pepper,	2 eggs,
2 tablespoons melted butter.	1 teaspoon onion (chopped fine).

Have the butcher chop the veal and salt pork together fine, soak the stale crumbs in just enough milk to moisten and mix all the ingredients together well; put half the mixture in a deep, buttered tin and then lay lengthwise, close together, as many cold, hard-boiled, shelled eggs as there is room for in the tin (usually five); cover with the rest of the mixture, then cover the top with thin slices of salt pork, pour over four tablespoons of water and bake an hour or a little longer. When ready to serve slice crosswise of the loaf with a sharp knife and garnish with parsley.

—Mrs. James Toule.

VEAL POT ROAST .

—Mrs. F. E. Walbridge.

VEAL POT ROAST.

Put a piece of butter, the size of a walnut, and three or four pounds of veal into a smoking hot iron kettle. Keep turning the meat until all sides are well seared, then sprinkle a tablespoon of flour over it, season with salt and pepper, and add a little hot water. Watch it carefully, as the flour has a tendency to make it scorch, and replenish the water as it boils down. Cook slowly about two hours. Twenty minutes before serving put in some peeled potatoes; when they are done place the meat on a platter and the potatoes around it; pour the thick brown gravy over the whole. Or, instead of the potatoes, add dumplings made of one cup flour, one heaping teaspoon baking powder, one-quarter teaspoon salt and milk to make a stiff batter. Drop in kettle a tablespoonful at a time and boil, closely covered, for twenty minutes.

—Mrs. C. A. Weil.

MOCK TERRAPIN.

Cut a calf's liver in slices and fry in butter until nearly done; then chop coarsely, season with salt, pepper and a little onion; add four hard boiled eggs, chopped, one cup of hot water and a little sprinkle of flour. Cover closely and let simmer slowly.

—Mrs. Chas. A. Silberzahn.

CALF'S LIVER AND BACON.

Slice the liver a quarter of an inch thick, pour hot water over it and let remain a few minutes to clear from blood; dry with a cloth. Cut about a pound of bacon into as many thin slices as there are of liver. Fry the bacon to a nice crisp and keep hot; then fry the liver in the same pan, having seasoned it with pepper and salt, and dredged it in a little flour. Serve with a slice of bacon on each slice of liver.

—Mrs. Victor Husting.

CALF'S HEAD CHEESE.

Boil a calf's head in water enough to cover, until the meat leaves the bones; put in wooden bowl, chop fine, season with a teaspoon of salt and a teaspoon of pepper. Lay a cloth in colander, put meat into it, fold the cloth closely over it, cover with a plate and put a weight on it. Slice when cold.

Let beef stew in this liquid until tender, then take it out and slice. Add to the gravy one tablespoon brown sugar, and two tablespoons flour browned in a piece of butter and stirred very smooth. or three gingersnaps stirred to a smooth paste with hot water. Put the sliced meat back in the kettle and let it simmer slowly until ready to serve. Serve with potato dumplings.

—Mrs. A. B. Liebermann.

SOUR FLEISCH.

FRENCH TOAST.

Mince the meat fine, put in a stew pan with gravy left from day before roast or stew, season with chopped celery or parsley, salt and pepper; while this stews gently for ten minutes, toast and butter enough bread to cover a hot platter; spread a large spoonful of the stew on each piece of the toast and serve at once.

CROQUETTES.

To one pint of minced cold meat, add one teacup of bread crumbs, one beaten egg, salt and pepper; make into little pats and fry brown in drippings or butter.

TO USE SMALL PIECES OF COLD HAM.

Chop the ham fine, add a few bread crumbs, a little milk and season with mustard, if desired; mix thoroughly; line gem irons with it, patting it in firmly; break an egg in each ring and bake quickly until the eggs whiten on the top.

—Mrs. Tippet.

HASHED MEAT NO. 1.

$\frac{1}{2}$ pound cold meat,	$\frac{1}{2}$ ounce flour,
$\frac{1}{2}$ ounce butter,	$\frac{1}{2}$ pint stock or water,
$\frac{1}{4}$ teaspoon salt,	1 onion,
$\frac{1}{4}$ teaspoon pepper,	3 cloves.

Cut meat into slices, trimming off the outside brown edge and any gristle. Peel and slice the onion; melt the butter in a stew pan; fry the slices of onion a light brown, stir in the flour, add the stock or water. Let the sauce boil a few minutes then add the cloves, pepper and salt, lay in the slices of cold meat, put on the back of stove where it can simmer very gently, but not boil, or the meat will be hard. If the sauce is too thick, add a little more stock or water before putting in the meat. Let it simmer ten or fifteen minutes; serve with sippets of toasted bread or a wall of mashed potatoes. If the sauce is not brown enough, add a little brown flour or a teaspoon of mushroom catsup.

HASHED MEAT.

Slices of cooked meat,	2 tablespoons crumbs,
1 teaspoon parsley,	$\frac{1}{2}$ teaspoon salt,
$\frac{1}{2}$ teaspoon thyme,	1 egg,
$\frac{1}{4}$ teaspoon pepper,	1 teaspoon lemon juice.

Trim the slices of meat; mix the chopped parsley and thyme, pepper and salt with bread crumbs; break the egg on a plate, beat slightly; dip slices of meat in the egg, then into bread crumbs covering both sides of meat. Put about an

ounce of butter or very good dripping into a pan; let it get hot and fry the meat a light brown. Make a sauce of butter and flour, as directed for hashed meat No. 1, add the lemon juice after sauce is taken from the fire; arrange the meat on a serving dish and pour sauce around it. This dish can be varied by laying the slices of meat on a bed of vegetables, such as peas, mashed potatoes, French or haricot beans.

Let all brown together, then add boiling water, a little at a time, and cook until tender. The gravy must be a rich brown. Serve with dumplings.

—Mrs. A. B. Liebermann.

CROQUETTES.

To make appetizing croquettes from the remnants of meat, poultry, etc., it is necessary to use the same discrimination that is requisite in making good soup—that is, care must be taken that one seasoning has not undue prominence over another—all being so finely blended that they shall seem as one to the palate. Take any pieces of cold meat, add egg cooked in any way, if it be on hand, and mince fine. Into three cups of meat thus minced, chop two level teaspoons of sage and a piece of onion, the size of a small nutmeg. Next add half cup cracker or bread crumbs, for the above amount of meat, a well beaten egg, one cup or less of good gravy, salt and pepper to taste. CREAM CANDY.

3 pounds sugar, 1 teacup water,
2 tablespoons vinegar, Vanilla flavor.

CREAM CANDIES.

Boil four cups granulated sugar and one cup water without stirring until it begins to thread; take from stove and let stand until it begins to thicken, then stir until white and too stiff to handle with a spoon. Add one teaspoon of vanilla while stirring, then knead like dough until cool. (To prevent the outside from crusting while moulding, cover with a napkin wrung out of cold water.) This is the foundation or fondant. Varieties:

1. Remove the stones from dates; fill with the fondant, press sides together and roll in granulated sugar.

2. On little balls (moulded by rolling in the hands) press an almond, the half of a walnut or pecan.

3. Knead into a part of the fondant as much shredded cocoanut as desired, then mould and roll in cocoanut.

4. Chop together dates and figs. Take part of the fondant and flatten on a plate (dusted with powdered sugar) until about six inches in length and three inches in width. Then mould enough of the chopped fruit to make a roll of the same length and the thickness of a pencil. Place on the strip of fondant, turn the edges together and roll until round and smooth. Then cut with a knife into pieces one-half an inch in width.

5. By mixing equal quantities of the fondant and chopped fruit little fruit balls may be made.

6. By pouring a few drops of water on one-half teaspoon red sugar, or on a few little red peppermint drops, and mixing a very little of this with the fondant, it may be tinted pink; also, by working in grated Baker's sweet chocolate a pretty brown may be obtained.

7. Take three portions of the fondant, color one brown and one pink, flatten the white portion on a plate, dusted with powdered sugar; on this place the pink and then the brown. Cut into squares.

8. For making chocolate drops, let the balls made of the plain or pink fondant stand over night. Then stick a toothpick or hatpin into each and dip into sweet chocolate until thoroughly coated. The grated chocolate is melted by placing it over a steaming teakettle. —Anna Gossel.

1 pint vinegar,	1 teaspoon cloves,
2 pounds sugar,	Lemon rind,
	1 teaspoon cinnamon.

Boil together until consistency of jelly, and put in covered jars. Good. —Mrs. W. P. Rix.

SPICED CURRANTS.

7 pounds currants,	1 tablespoon ground cin-
4 pounds sugar,	namon,
1 pint good cider vinegar,	1 teaspoon cloves.

Put into kettle and boil until the fruit is soft, then skim out, putting it on dishes until the syrup is boiled down thick. Turn the fruit back into the syrup again so as to heat it all through; then seal it hot in glass jars and put in a cool, dark place. —Mrs. Marie Pick.

SPICED GRAPES.

5 pounds grapes,	1 tablespoon cinnamon,
4 pounds brown sugar,	1 teaspoon allspice,
1 pint vinegar,	Sprinkling of pepper.
1 tablespoon cloves,	

For this purpose the late Isabella grapes, not very well ripened, are the best. (Weigh before picking from the stems.) Strip the grapes, one by one, from the stems, "popping" the

pulp into one kettle and throwing the skins into another; put both kettles over the fire, adding just enough water to each to keep from scorching. As soon as the seeds loosen from the pulp, press through a colander, add the pulp to the skins, then add the other ingredients and cook slowly three or four hours, or until quite thick.

SPICED RHUBARB.

2½ pounds rhubarb,	1 tablespoon cloves,
1 cup vinegar,	1 tablespoon cinnamon.
2 pounds sugar,

SPICED TOMATOES.

1 pint cider vinegar	½ ounce cloves,
4 pounds brown sugar,	1 ounce cinnamon.
7 pounds green tomatoes,

2 pounds brown sugar,	stick cinnamon, cassia
1 pint vinegar,	buds, allspice and cloves.

Tie spices in a bag and boil with the vinegar and sugar. Skim well; add fruit, cook until tender; skim out and put in stone jars; boil syrup five minutes longer and pour over the fruit; for three mornings pour off the syrup, boil and pour over the fruit; keep the bag of spices in the syrup.

RULE FOR MARMALADES, PRESERVES AND JAMS.

Marmalade is made of the fruit pulp put through a sieve and boiled with an equal quantity of sugar very slowly one-half or three-quarters of an hour.

Preserves are prepared with equal weights of sugar and fruit. A syrup is made by adding as little water as possible to the sugar; when it boils, skim until clear, then add fruit and cook until tender.

Jams are usually made with whole, small fruits. Mash the fruit and cook it in an equal weight of sugar.

PLUM PRESERVES.

Cut one large, ripe tomato in three pieces, add to the plums, pour boiling water over and boil till ready to pit; then remove the tomato and pits and add to the plums an equal measure of sugar, stir until it boils, then skim out the plums, cook syrup till thick and pour over the plums in a jar.

—Mrs. G. D. Gould.

GREEN TOMATO PRESERVES.

One peck tomatoes, cut each in two; mix well with six pounds sugar and let stand over night. Next day drain off juice and boil to a syrup. Add tomatoes and six lemons, sliced, and cook until transparent—about two hours.

RIPE TOMATO PRESERVES.

Seven pounds ripe tomatoes, three-quarters pound sugar to one pound tomatoes. Let them stand together over night; in the morning drain off the syrup and boil it, skimming well; then put in the tomatoes and boil gently twenty minutes; take out the fruit with a skimmer and boil syrup until it thickens. Ten minutes before taking from the fire, add three lemons, sliced, and a little ginger root, if preferred; put the tomatoes into jars and fill with the hot syrup. Seal when cold.

—Mrs. B. Schallern.

SUNSHINE PRESERVES.

Cook one pound strawberries and one pound sugar for one hour, then spread the strawberries on platters, cook the juice a little longer, pour over the strawberries and let stand in the sun for two days, then put in glass cans.

—Mrs. Nellie C.

PEACH ROLL.

Peel Freestone peaches, stone, mash fine, put through a coarse sieve and to two quarts of pulp add one pint of brown sugar; mix and cook for two minutes, then spread on plates and let stand in the sun about three days or until it cleaves from the plates readily, then dust sugar over and roll up; keep in a dry place.

—Mrs. Owens.

GOOSEBERRY JAM.

Pick the berries just as they begin to turn. Stem, wash and weigh. To four pounds of fruit add one-half teacup water; boil until soft; add four pounds sugar and boil until clear.

QUINCE JAM.

Grate two quinces. Make a syrup of three pounds sugar and one pint water. Add quinces and cook ten minutes. This is nice for hot griddle cakes.

STRAWBERRY JAM.

Take equal parts of pieplant and strawberries. Boil pieplant and if too juicy drain off a part of the juice, then add the strawberries, sweeten to taste and boil until thick.

—Dorothy B. French.

TOMATO JAM.

1 peck ripe tomatoes,	4 pounds brown sugar,
5 big sour apples, sliced very thin,	4 pounds white sugar,

—A. Hunter.

ORANGE MARMALADE. (English.)

7 large oranges,	1 gallon cold water,
4 lemons,	5 pounds sugar.

—Mrs. C. A. Weil.

PIEPLANT MARMALADE.

3 pounds pieplant, 2 lemons,
3 pounds sugar, $\frac{1}{2}$ pound almonds.

Peel and cut the pieplant in small pieces, blanch and chop the almonds fine, then boil the pieplant, sugar, juice and grated rind of the lemons for thirty minutes, then add the almonds, boil twenty-five minutes more and put in jelly glasses.

—Mrs. S. E. Penney.

APPLE BUTTER.

Boil new cider down one half, then add an equal quantity of pared, cored and quartered apples, boil until the apples are tender, sweeten to taste with light brown sugar, and boil, with constant stirring, until it is reduced to a smooth, buttery mass; keep in stone jars.

—J. B. Smiley.

CANDIED ORANGE PEEL.

Cut the rinds of a dozen oranges into small pieces, boil about an hour and a quarter, changing the water three times; then drain thoroughly, add a cup of sugar and let stand on the stove until the sugar dissolves; then spread on plates, stir occasionally and when thoroughly dry, put in a glass can. Lemon peel may be candied the same way. Nice for a dessert, or for flavoring fruit cake.

CANNED BEANS. (Fine.)

String and cut fresh snap beans as if for immediate use; fill a jar with alternate layers of the uncooked beans and salt, allowing a half cup of salt to each quart of beans; then fasten air tight with the salt at the top. Will keep crisp and green for months and taste almost as good as fresh; can also be taken from the salt and pickled at any time.

—N. H. White.

TO PUT UP BEANS.

Cut off the ends and boil the beans in salted water until about half tender; then drain and drop into boiling water, salted in the proportion of two tablespoons salt to each quart of water. Boil about ten minutes, then put in glass jars, cover well with the water in which they were boiled, and seal. The jar should stand in hot water while filling.

—Lizzie Schottler.

TO KEEP BEANS.

Rub five quarts of beans, one quart of salt and one pint of sugar together until juicy, then put in a jar with a weight over.

Helps to Young Housekeepers.

“Live and Learn.”

Good yeast, good flour, good judgment and watchful care are essentials in bread making. Good flour is cream white, holds together in a mass when squeezed by the hand and retains the impression of the fingers. Learn to make good homemade yeast. Keep the sponge near the stove, where it will keep warm. Bread is “light enough” when it has doubled its bulk, and is ready for the oven when the loaves will not retain the dent of the finger. Bread should bake an hour; rolls and biscuits should bake quickly; baking powder and cream tartar biscuits should be made quickly as possible and baked in a hot oven. Pans, especially for gems, should be greased and heated before putting in the dough or batter. Flour should *always* be sifted before using, and in winter should be warmed. When fresh bread is made, a part of the dough may be set aside in a cold place and rolls made the next day. In winter, kept cold, yet not in danger of freezing, bread dough may be kept a week. Stale bread may be used in griddle cakes, omelets, dressings, scalloped dishes, toma-

toes, etc.; it may be dried in the oven, rolled fine and kept in a paper bag, or in a glass jar, for future use.

In adding eggs to custards, soups, sauces, etc., remember to add a few spoonfuls of the boiling liquid to the eggs before stirring them into the mixture. If this is done carefully, the eggs will not curdle as they have an annoying habit of doing when stirred directly into a hot mixture.

To separate fat from soups and gravy, thoroughly wet a clean white cloth in very cold water; pour soup or gravy through it; every particle of fat will remain in the cloth. Butter will blend better with soups if it is browned a little before adding.

To clarify beef drippings, place the drippings in a basin, slice into it a raw potato, let boil long enough for slices to brown, then cool, drain from the sediment and put in a cool place. When mixed with an equal quantity of butter it answers the same purpose as clear butter for frying and basting any meats, save game and poultry.

A piece of charcoal, tied in a muslin cloth, and put in the water in which cabbage, cauliflower, onions or ham is boiling will remove the unpleasant odor. Pepper pods answer the same purpose. A piece of bread tied in a cloth and boiled with strong vegetables will make them much milder.

In making soups put the meat over in cold water. Fresh fish, game, or meats of any kind, are improved by being salted

over night. Soups and stews should be cooked slowly; the more gently meat boils the more tender it will become; a tough piece of meat can be made tender by cooking for several hours in water at a simmering heat. Roast meats should be put into a smoking hot oven; after the surface is seared over, the heat should be diminished and the roast cooked slowly until done.

Chicken or turkey oil is very nice to use in place of salad oil or butter, in making salad dressings.

Fowls, especially water fowls, after removing the feathers, and singeing, should be thoroughly washed with soap and water, after which they should be well rinsed. Another very good way to cleanse chickens, turkeys, etc., is to rub them thoroughly with dry oatmeal. In summer, dressed poultry, should have a piece of charcoal placed inside to be removed before cooking.

Milk is curdled by salt, so do not add to milk dishes until they are nearly cooked.

In filling salt shakers, add a little cornstarch to the salt and there will be a saving of time and temper.

Wash egg shells when they come from the market, and then they may be used for clearing coffee, soup, etc.

To chop suet, break into small bits, sprinkle with flour and chop in a cool place.

To clean currants, put in a colander, sprinkle well with flour, rub until grit, flour, etc., have passed through the strainer. Place in a pan of water and wash until water is stand ten minutes, when seeds are easily removed.

To blanch almonds, remove shells, pour over boiling water and let stand until the dark skin rubs off easily; then put in cold water, rub off the skins and dry between towels.

To remove the skins easily from peaches, plums or tomatoes, dip them in boiling water a minute or two.

In mixing cake, where other methods are not given in this work by contributors, it would be well to observe the following directions: Beat the butter and sugar to a cream; add the beaten yolks, spices or flavorings, milk or water, flour, into which the baking powder has been sifted, and lastly, the beaten whites. When fruit is used it should be dredged with flour and added last. Cakes, made with butter, should be beaten long and vigorously after adding the flour, that they may be smooth and fine grained. Sponge cakes should not be beaten after adding the flour, but require much beating before. All cakes, except those containing yeast, should be baked as soon as possible after they are mixed. Cakes with fruit in should be mixed stiffer with flour than those without fruit. Cakes with molasses in will burn more quickly than others. Baking powder should be sifted into the flour, and soda dissolved in sour milk or in hot water. In making sour

milk biscuits, doughnuts or cakes, in addition to the soda required to sweeten the sour milk use a little baking powder in the flour. Thin cakes should bake from fifteen to twenty minutes, thicker cakes from thirty to forty minutes, very thick loaves about an hour, and large fruit cakes two to three hours. To prevent cake or pie from burning, place a pan of cold water on the upper grate within the oven. A cake will never be tough if a level tablespoon of cornstarch is sifted into the flour.

Doughnuts will not take up the lard if one level teaspoon of ginger is sifted into the flour.

What is left of a steamed pudding can be steamed over just enough to heat it through, and will be quite as nice as when first served.

Tea and coffee, made hot before water is added, are more fragrant and stronger.

To keep lemons fresh, put them in a jar and cover with water; in summer change the water twice a week.

In canning fruits see that the covers and rubbers are in perfect form.

Keep pieces of charcoal in the refrigerator, change them often.

Diet for the Sick.

BY DR. J. H. WEHLE.

In serving a meal to an invalid, one cannot be too fastidious: too large a portion, a suspicion of grease on the broth, will often spoil the appetite. The linen, glass, dishes, etc., should be the best in the house; a tiny flower laid on the folded napkin will do much to render the meal pleasant.

CALVES' FEET BROTH.

2 calves' feet,	1 egg,
2 quarts water,	Salt,
2 tablespoons milk,	Pepper.

Boil the feet to shreds and strain liquor. Add egg and milk; give one boil up and serve hot with toast.

EGGS.

Boiled. Dip a heavy coffee cup in boiling water (by running a string through the handle) and heat for five minutes; then break an egg into it and cover cup. The heat of the cup will cook the egg sufficiently; season to taste.

EGG LEMONADE.

4 lemons (juice of four, 6 ounces loaf sugar,
 rind of two), 1½ pints boiling water.
4 eggs,

Pare lemon rind thin; put into pitcher with sugar and pour the boiling water over. Let cool and strain, then add lemon juice and beaten eggs.

JUNKET.

Take one-half pint of milk (lukewarm—100 degrees F.), sweeten with sugar, if necessary; add one teaspoon of Fairchild's essence of pepsin. Stir and divide into small cups or glasses and set aside until it jellies. It may be placed in ice before serving. This may be flavored with vanilla, nutmeg or cinnamon. If digestion is feeble, use liquid whey instead of the curd.

EGG JUNKET.

Two eggs beaten to a froth and sweetened with four teaspoons of sugar, may previously be added to milk; heat lukewarm; add essence of pepsin and proceed as above.

COCOA JUNKET.

Scald a teaspoon of cocoa and two of sugar with two tablespoons of boiling water. Rub to a paste, add one-half pint of milk and heat mixture lukewarm. Add essence of pepsin and proceed as above.

COFFEE JUNKET.

Dissolve two teaspoons of sugar in two tablespoons of strong coffee and proceed as above.

STRAWBERRY, VANILLA AND BITTER ALMOND
JUNKET.

Add one-half teaspoon extract of vanilla or bitter almond extract to above. Strawberry: One tablespoon of strawberry syrup to above.

KOUMYSS.

Take a strong bottle (like champagne bottle) with a long neck and fill to lower end of neck with fresh, lukewarm milk; add two tablespoons of sugar and shake; then one-sixth of a cake of Fleishman's compressed yeast and cork. Wire or tie securely, as the Koumyss may pop. Set the bottle in temperature of 100 degrees F., for 8 or 10 hours; then place in cellar or on ice and use as needed. (Use champagne tap, or open carefully.)

MILK.

As milk is disagreeable to many it may be flavored by boiling a stick of cinnamon in it; if it is not easily digested, lime water or a little bi-carbonate of soda may be added.

PEPTONIZED MILK.

Take a quart Mason jar and pour into it a teacup of lukewarm water. Dissolve in this one of Fairchild's peptonizing tubes. Add one pint of fresh milk and shake. Place the jar for ten minutes in water so hot that the hand can be held in it for one minute (say 115 F.). Now bring it to a boil at once, or put on ice. If directions are not carefully followed the mixture will become bitter.

SAVOURY CUSTARD.

Add yolks of two eggs to a cupful of beef tea; season with salt and pepper. Butter a cup, pour the mixture into it and let it stand in a pan of boiling water until the custard is set.

SCOTCH BEEF BROTH.

Remove the fat from a pint of strained beef broth, season, add one teaspoon of oatmeal and boil gently for two hours.

AN EXCELLENT SUBSTITUTE FOR BUTTER.

Take six pounds of suet from the breast of beef (kidney suet will not do), and three pounds best butter. Cook each slowly for several hours. Remove the scum from the butter as it forms, and when done pour off from the sediment at the bottom, then turn the suet and butter together while hot and pour into a stone jar. Will keep sweet for months, and can be used with perfect satisfaction in place of butter, either in baking or cooking.

TO KEEP BUTTER. (German Method.)

Put twenty pounds in a preserving kettle on the back of the stove to avoid all risk of burning, cook slowly seven or eight hours, stirring often. When done will be a pale yellow with brown sediment at bottom. Pour off the clear butter into stone jars, and set it in a cool place. Gives a fine flavor to meats and keeps six months or more.

BAKING POWDER.

Eight ounces bicarb. soda, six ounces tartaric acid, two-thirds quart of flour. Sift at least twenty times (forty will be better), and do not throw away the pieces left in the sieve, but mash them and sift again. Must be kept in cool, dry place. Use like any other baking powder.

—Mrs. R. S. Lynch.

Rub the beef with dry salt, let stand on its side to drain over night; in the morning pack tight in a jar, pour the brine over and in two weeks it will be ready to use. In cooking this pickled or corned beef, change the water at least twice and boil very slow not less than four hours. Add one cup soda to this brine and it makes fine pickle for pork. Leave the hams in the brine from four to six weeks, then remove and smoke.
